A new rail spur, observed [REDACTED] is under construction approximately 27 nm NW of Cheremkhovo. The spur branches westerly from the Trans-Siberian Railroad and terminates in 3 sidings. Several large rectangular buildings are located along the sidings. An area containing at least 18 buildings is located just east of the sidings, and another with about 24 buildings is located along the spur to the south. The rail spur can be negated [REDACTED] the 2 building areas, however, were present prior to the construction of the rail spur. They were first seen [REDACTED] and were not present [REDACTED]

There is no evidence of any ICBM-associated activity in this area at the present time; however, the rail spur activity will continue to be observed.
